LEIBINGER

100% protection
SEALTRONIC
trouble-free startup, every time

UPgrade your marking process

JET3 UP PRO
Industrial Inkjet Printer
LEIBINGER inkjet printers code all conceivable products and materials, such as plastic, glass, wood, metal, ceramic, technical composite material, cardboard and paper without making contact using fixed and variable data. Examples of applications include expiration dates, LOT/batch numbers, serial numbers, barcodes, 2D codes and graphics. Special inks are used that dry in less than one second. The marking process takes place during production speeds up to 1960 ft/min. Various product surfaces do not pose a challenge for the LEIBINGER inkjet printer, regardless of whether they are convex, concave, rough, smooth, flat or structured. Non-contact marking and fast product processing make CIJ technology the most flexible, versatile and cost-effective method of marking products.
The advantages are obvious!

100% protection against dust and spray water
Protection class IP65. Robust stainless steel housing, integrated head ventilation. No hidden dirt traps. Meets high hygiene requirements of the pharmaceutical and food industries.

Maintenance-free starting without cleaning – guaranteed!
Automated Sealtronic nozzle seal. No drying out of ink in the printhead. Ready to print immediately, even after long shut-down periods.

Reliable production
Consistent prevention of downtime. No daily service work, no forced stops due to scheduled service intervals. 100% availability.

Maximum print quality, wide range of applications
Accurate placement of ink drops using Drop Position Control. High-precision and high-contrast printouts. Static and variable data such as technical data, special characters, serial numbers, barcodes, 2D codes, graphics and much more.

No wait times – ready for operation immediately
The Clean Instant Start and Stop Technology is used to make the JET3up PRO ready for printing in only a few seconds. Always a clean printhead with any number of start and stop cycles.

More than 2,000 products/minute*
Marking up to 10 m/s (36 km/h)!

Intuitive operation
Easy and fast, like your computer at home. Color 10.4” touch-screen display. Windows-based, customizable user interface. Optimized menu navigation.

Low operating costs
No solvent consumption during production shutdowns using Sealtronic. Low maintenance costs. No replacement of expensive modules.

Countless functions without additional costs
All interfaces and over 800 software functions are standard. Easy integration into the production line. Free lifetime software updates!

CUSTOMERS REPORT:
Over 70 million imprints in a real production environment with LEIBINGER printers without having to clean them even once!

Made in Germany

24-MONTH WARRANTY

* Depending on print type and content
One printer – infinite possibilities:
The JET3<sup>up</sup> PRO from LEIBINGER

Where do you want to make your mark?
The JET3<sup>up</sup> PRO can be used anywhere

Text, barcodes, LOT/batch numbers, 2D codes, expiration dates, counters, graphics and much more – the JET3<sup>up</sup> PRO handles every marking requirement even under rough production conditions.
Sealtronic makes the difference

The automated Sealtronic nozzle seal is one of a kind

» due to its accurate precision engineering.
» in its operating principle.
» in its effectiveness.

LEIBINGER printhead with nozzle seal

Shut down process
The gutter is moved to the nozzle automatically when shutting down the printer, forming a hermetically sealed, airtight circuit. The result: 100% secure protection from ink drying out!

Startup process
First, the ink begins to flow in the sealed circuit creating a stable ink stream. The gutter then opens automatically. This happens within a few seconds and guarantees a fast and error-free start. The printhead remains absolutely clean in this process.

Conventional printhead without nozzle seal

Shut down process
Nozzle and gutter remain open. The residual ink is exposed to the air unprotected and dries out. This causes problems the next time the printer is started.

Startup process
The conventional design causes an unstable startup of the jet. The result: the printhead gets dirty regularly and thus drop charging is degraded right from the start.

The advantages for production

» Immediate, reliable starting
» No delays in the start of production
» No cleaning cycle required
» No production interruptions
» Long availability - typically months between cleanings
Countless requirements – always the right solution

There are over **800 functions standard** in the JET3up PRO able to handle a wide variety of applications. You can always find the best solution for yours!

**Here are some examples:**

- Automatic forward/backward switching
- Special function for traversing applications

and many more …

**Autostart function**
- Prompt field (fast edit)
- Batch job
- Intelligent self-test
- Database/server access

- Scanner job selection
- Various protocols
- Font and graphic editor
- Meter marking
- Remote access

**Large selection of colored inks (depending on the model combination):**

- Fast-drying solvents inks (<1sec)
- MEK-free, ketone-free and alcohol-based inks
- Food-grade ink and food packaging inks
- PVC inks (vinyl inks), halogen-free inks
- Temperature and transfer-resistant inks
- Special inks, such as security, color changing, sterilization, washable adhesive and alcohol-resistant inks
- Various pigmented contrast inks (in combination with JET3up PI)
- Custom special inks

and many more …

**Variety of accessories and options**

- Various nozzle sizes and head versions
- Also available for microprints and pigmented inks
- Umbilicals up to 32.80 ft in length
- JETmotion linear system
- Expanded computer software solutions
- Camera verification system

and many more …
The JET3up PRO: Easy, intuitive and reliable

With its large 10.4" touch-screen color display and Windows-based user interface, the JET3up PRO is just as easy to use as your computer at home:

» Typical functions such as drag and drop
» Illustrated operator instructions
» User-defined interface with buttons for direct access

Increase your efficiency and lower your costs

» Extremely low energy consumption
» Easy automation integration through a wide variety of interfaces
» 8 years guaranteed replacement part availability
» Easy, cost-efficient maintenance and long service intervals
» Minimal solvent consumption using Solvent Saving Mode and Sealtronic
» Consistent prevention of production interruptions using LEIBINGER technology
» Free software updates

We are there for you – worldwide!

With over 100 LEIBINGER authorized dealers worldwide, we can guarantee you one thing: the best service on-site.
PRINT PERFORMANCE/FUNCTIONS

- Printing speed up to 1960 ft/min
- Printing height 0.03” to 0.63”, depending on nozzle size, head and printer type
- Country and industry-specific fonts: Arabic, Cyrillic, Chinese, Persian, etc.
- Fonts: from 5x5 to 32x20, special fonts, user-programmable fonts, tower printing
- Multi-line fonts (1 to 5 lines)
- Fonts and graphics can be positioned and combined in the print jobs as desired
- Proportional function for all fonts
- Font height and font width adjustable
- All major barcodes and DataMatrix codes (ECC200), GS1 DataBar (SITC, ILR, Code, PbP-Code, PPN-Code)
- Time, auto-adjustable date, auto-adjustable expiration date, weekdays, calendar weeks, Julian calendar, shift identification
- Replacements: all date, time and counter functions can be replaced and user-programmed
- 32 individually programmable counters, consecutive numbering, production counter, meter marking with "Meter Go" function
- User-programmable graphics/logos can be created in the integrated editor
- Multi-stage contrast and bold function, print repetition, print delay, backward print, rotation/mirroring of font, inverse, reverse and alternating prints (object-related)
- Dynamic backward printing, for traversing lines
- Programmable batch production and interlinking of multiple jobs
- "External text" function via scanner or data interface
- Printing variable data from external files via USB stick or data interface
- Stop function after reaching preselected value
- Product jam detection / monitoring of product alignment
- Autostart function
- Prompt function (fast edit)
- Solvent Saving Mode
- Self-test function
- "External text" function via scanner or data interface
- Printing variable data from external files via USB stick or data interface
- Stop function after reaching preselected value
- Product jam detection / monitoring of product alignment
- Autostart function
- Prompt function (fast edit)
- Solvent Saving Mode
- Self-test function

DATA ADMINISTRATION/SECURITY

- Data buffer in case of power failure
- File Explorer
- Print jobs saved with printing data and machine parameters
- Printer data logging, production run logging
- Up- and download of jobs and graphics using USB stick or network
- Jobs select (1023 jobs selectable from scanner or PLC)

OPERATION/DATA INPUT

- 10.4” colour TFT touch-screen display (SVGA)
- Creating and editing jobs during production
- Customizable user interface
- Available menu languages: European languages, Arabic, Chinese, Vietnamese, Thai, Korean, Cyrillic, Persian, etc.
- Integrated font and graphic editor
- Illustrated operator instructions
- Alternative control using the data interface (serial or Ethernet)
- Country-specific on-screen key pad
- Operational available by mouse or keyboard
- Comprehensive self-diagnostics and status display with easy-to-understand text, help function, printer status display
- Storage of numerous jobs and graphics
- Password function and service menu
- Windows based interface, WYSIWYG, real-time updating of display
- Remote control over VNC

INTERFACES, INPUTS/OUTPUTS

- Product detector PNP/NPN 24V, FIFO buffer
- Shaft encoder input for printing speed synchronisation (TTI, 5V, HTL, 24V, RS422, 5V)
- 9 digital inputs and 8 outputs, user-selectable
- Printer alarm, low fluid, print ready, print finished, external job selection etc.
- Serial interface RS232 up to 115200 baud
- USB port
- Ethernet (industry standard M12D), script protocol
- Sensor for product monitoring and speed measurement
- Option: Special interface to connect several printers

LEIBINGER HYDRAULIC SYSTEM

- Low maintenance, diaphragm pumps with optimized run time
- Fully automatic viscosity and pressure control
- Thermally isolated hydraulic lines
- Automatic monitoring of compressed air
- Automatic daily interval function (Auto ink circulation)
- Integrated cabinet ventilation

PRINT HEAD

- Flexible umbilical, length: 9.84 ft, optional: 19.68 ft or 32.80 ft
- Stainless steel cabinet
- Fully automatic nozzle and gutter seal "Sealtronic"
- Fully automatic drop changing, drop break off control
- Nozzle size from 35 to 70 µm, depending on the model
- Upside down - 360° operation
- Head ventilation, options: 45° to 90° bent umbilical, various print head versions
- Automatic inkjet monitoring

FLUID RESERVOIRS

- Capacity of the ink and solvent tanks are 1 quart, refillable while printing
- Level gauge with fully automated monitoring
- Remaining prints are displayed

INKS

- Fast-drying solvents inks (<1sec)
- MEK-free, ketone-free and alcohol-based inks *
- Temperature and transfer-resistant inks *
- Vy恰当 color changing, sterilization, washable adhesive, alcohol-resistant and UV fluorescent inks *
- Food-grade ink and food packaging inks *
- Custom special inks *
- Ink colors: black, white, yellow, red, blue, green, gray, silver-gray, orange*

WEIGHTS AND PROTECTION CLASS

- Weight: print head 3.31 lbs, cabinet 45.2 lbs
- Protection class: IP 65

SUPPLIES AND ENVIRONMENTAL CONDITIONS

- Temperature 50°F to 104°F (10°C to 40°C), typical 20 VA
- Relative humidity max. 90%, non-condensing
- Compressed air consumption: 3.5 cubic feet
- Required inlet pressure: 20.3 PSI

ACCESSORIES

- Product detector, shaft encoders, printer stand, print head bracket, alarm lamps etc.
- Software for remote control, multi-head control

*Availability depends on the printer model
